

Inbar Halutzy

BSc Student in Computer Science

skills

Programming Languages:

- **Java**
- **Python** (FastAPI, NumPy, Matplotlib, OpenCV)
- **C, C++**
- **JavaScript** (Node.js, React.js)
- **TypeScript** (Node.js, React.js, Express.js)
- **SQL**

Technologies & Tools:

Git, **GitHub**, **GitKraken**, **Docker Compose**, **Eclipse**, **VSCode**, **Axios**, **REST APIs**, **JWT Authentication**, **Linux**.

Database:

- **PostgreSQL** (SQL)
- **MySQL** (SQL)
- **Firebase**

AI Experience

AI Coding Tools :

- **Cursor**, **Antigravity**, **Claude Code+ MCP**, **Codex**, **GitHub Copilot**.

Certification:

- **Udemy**: [AI Coder – Vibe Coder to Agentic Engineer](#)

Languages

- **Hebrew**
- **English**

Profile

Computer Science student at Afeka College with a **GPA of 87** and **three semesters remaining**, seeking a **student software development position** where I can learn, contribute, and grow as a developer.

Education

● **B.Sc. in Computer Science** | Afeka College of Engineering 2023 – Present

- **GPA: 87**
- Focused on **Advanced Algorithms**, **Graph Theory**, and **Cybersecurity**.
- **Relevant languages:** Java, Python, C, SQL Web Development: HTML, CSS, JavaScript, TypeScript.

● **International Exchange Program (Erasmus+):**

- **University of Bergamo** (UniBg), Italy Focused on Computer Science and Academic English in a multicultural environment.

Projects

● **Fitness Class Management Platform | Full-Stack Web Application**

- **Tech:** **React** (TypeScript), **FastAPI** (Python), **PostgreSQL**, **Docker**
- **Key Features:** Advanced class search & filtering, session booking, waitlist management, integrated **payment flow**, and role-based access (Trainee / Trainer / Admin).
- **Architecture:** Designed using clean architecture principles (**Container/Component** pattern, service layer separation), with secure **JWT authentication** and **API-driven communication**.
- **Performance & Scalability:** Ensured data consistency under concurrent bookings (**race condition** handling), **implemented pagination** & optimized queries.
- [Code](#), [Architecture](#), [App](#)

● **Poker Night Ledger | Full-Stack Mobile App**

- **Tech:** Built with **React Native**, **Expo**, TypeScript, FastAPI, PostgreSQL, WebSockets, and JWT.
- **Key Features:** Real-time poker night management, player invitations, buy-ins tracking, shared expenses, final chip counts, and automatic settlement calculation.
- **Architecture:** Implemented a full-stack mobile architecture with a FastAPI backend, PostgreSQL database, JWT authentication, and WebSocket-based real-time updates.
- [Code](#), [App](#)

Tactical AI Simulation | C++ Object-Oriented Project

- **AI Core:** Implemented the **A* Search Algorithm** for real-time pathfinding.
- **Architecture:** Designed using a strict **Object-Oriented (OOP) approach**, featuring modular agent behaviors and structured team interactions.
- [Code](#)

Experience

● **Squad Leader | IDF Paratroopers Brigade (101st Battalion) 2016 – 2019**

- **Command:** Led a recruit training squad, overseeing the professional and personal development of dozens of soldiers.
- **Resilience:** Commanded high-intensity operations, demonstrating leadership and accountability under pressure.

● **Team Leader – Maritime Security | MSC Cruises (Brazil) 2021 – 2022**

- **Leadership:** Commanded a security team on an MSC Cruise ship, ensuring the safety of thousands of passengers and crew members.
- **Operational Management:** Managed complex security protocols and cross-cultural team dynamics in an international maritime environment.

● **Academic Tutor – Computer Science & Mathematics 2022 – Present**

- Providing personalized tutoring for B.Sc. students in Algorithms, Linear Algebra, and Discrete Mathematics.
